Reviews

It becomes an incredible book which i have ever read through. This really is for anyone who statte that there was not a well worth reading through. You wont sense monotony at at any time of the time (that's what catalogs are for regarding when you question me).

-- Alf Grant

This sort of publication is everything and taught me to hunting ahead and much more. Better then never, though i am quite late in start reading this one. I am just very happy to explain how here is the best pdf i actually have read within my personal daily life and can be he greatest publication for actually.

-- Laverne Farrell

Save up to 80% by choosing the eTextbook option for ISBN: 9781788993111, 178899311X. Mastering Machine Learning for Penetration Testing: Develop an extensive skill set to break self-learning systems using Python. Cyber security is crucial for both businesses and individuals. As systems are getting smarter, we now see machine learning interrupting computer security. What you will learn:

- Take an in-depth look at machine learning;
- Get to know natural language processing (NLP);
- Understand malware feature engineering;
- Build generative adversarial networks using Python libraries;
- Work on threat hunting with machine learning and the ELK stack;
- Explore the best practices for machine learning;
