

Searching Out the Headwaters: Change And Rediscovery In Western Water Policy #Sarah F. Bates, David H. Getches, Lawrence MacDonnell, Charles F. Wilkinson #9781559632188 #1993 #242 pages #Island Press, 1993

In book: Water Policy and Planning in a Variable and Changing Climate (pp.3-15). Authors: Kathleen Miller.Â Modern water policy requires new kinds of economic information in order to improve the ability of stakeholders and water authorities to analyze the whole set of alternatives available, to provide transparency and to assess and adapt water decisions to the emerging water management challenges. Considering this, we present an overview of the main drivers of economic information in the European [Show full abstract] water policy agenda as defined by the Water Framework Directive.Â Searching Out the Headwaters: Change And Rediscovery In Western Water Policy. To the uninitiated, water policy seems a complicated, hypertechnical, and incomprehensible subject: a tangle of engineering jargon and legalese surrounding a complex, delicate, and interrelated structure. Decisions concerning the public's waters involve scant public participation, and in such a context, reform seems risky at best. Searching Out the Headwaters addresses that precarious situation by providing a thorough and straightforward analysis Read Full Overview. Product Details.
