They don't reflect much light so most are not visible to the naked eye. Probably visibility of an particular satellite would be enhanced using binoculars or a telescope if you knew its exact position. I have had occasion to see several satellites in the early evening, with the naked eye, until they moved into the Earth's shadow. 648 views · View upvotes. Whether they are directing their attention in our direction and whether they could figure out our TV encoding scheme is a matter of pure conjecture.
