The Right Brain and the Unconscious pp 29-56 | Cite as. Right Brain-Left Brain and the Conscious and Unconscious Mind. Authors. Authors and affiliations. Language is often a tool of consciousness. We usually think in words and use language to label, describe, and communicate our experiences. It is through language and thought that we are able to manipulate the world, describe ourselves, make predictions about the future, and symbolize aspects of the past in verbal memory and in written form. Cite this chapter as: Joseph R. (1992) Right Brain-Left Brain and the Conscious and Unconscious Mind. In: The Right Brain and the Unconscious. Springer, Boston, MA. [https://doi.org/10.1007/978-1-4899-5996-6\\_3](https://doi.org/10.1007/978-1-4899-5996-6_3). Right hemisphere brain damage (RHD) is the result of injury to the right brain hemisphere. The right hemisphere of the brain coordinates tasks for functional communication, which include problem solving, memory, and reasoning. Deficits caused by right hemisphere brain damage vary depending on the location of the damage. Individuals with right hemisphere damage exhibit deficits in visual processing. It appears as though they are only able to recognize the parts of a picture, symbol, etc. rather than The Left Hemisphere of the Brain. The Two Hemispheres and Brain Lateralization. Brain Hemispheres: Do we use one more than the other? Where Did the Myth of the Right Brain and the Left Brain Come From? How the Two Hemispheres Work. How do the brain hemispheres work? The consciousness of oneself. Recognizing our image in a mirror. Facial recognition.
