North Bengal is famous as a business hub for tea, timber and tourism. Recent development in a wide variety of emerging sectors such as real estate, IT and ITES, healthcare, education, manufacturing etc is raising new hopes. With mangoes in Malda, pineapples in Uttar Dinajpur, Darjeeling and Jalpaiguri, Black Pepper in Alipurduar, oranges in Darjeeling and Jalpaiguri districts, the region is also a veritable food basket. The district has potential for development of jute textile industries, Industries related to processing of jute and thus enhancing jute trade. In Malda district mango is cultivated extensively. Growth process can be led by a widening of market, which in turn may result from increased efficiency in transport and communication. Cheapening transport fuses markets; bringing additional buyers and sellers into contact with one another, increasing elasticity of demand and supply. Roads and transport, railways, ports, aviation and tele-communications are viewed as sinews of the economy and catalysts for social and economic change. They establish forward and backward linkages with the rest of the economy. Development of minor and intermediate. employment opportunities and. ports along the East Coast through Private. drives economic growth; and more. Public Participation (PPP) mode. importantly The 19th century introduced new and increasingly efficient forms of transportation and communication to Newfoundland and Labrador. Roads and railways linked many isolated communities by providing fast and convenient modes of land-based transportation, while government-subsidized steamships transported mail, freight, and passengers to remote coastal settlements and urban centres. Marine Transportation. Aside from a few paths and trails, no actual roads linked Newfoundland and Labrador's communities until 1825, when the government built a carriage road between St. John's and Portugal Cove. Instead, the ocean served as the country's highway and marine vessels were its principal means of transportation. In communications also, the dominant lines of development continue to be those that were established before or during World War II. In particular, the rapid growth of television services, with their immense influence as media of mass communication, was built on foundations laid in the 1920s and 1930s, while the universal adoption of radar on ships and airplanes followed the invention of a device to give early warning of aerial attack. But in certain features the development of communications in the space age has produced important innovations. First, the transistor, so significant for computer It plies buses mainly in North Bengal but operates services to other parts of West Bengal and neighboring states.[1]. YouTube Encyclopedic. 1/2. The vision of the corporation for coming days is to operate economic, efficient and properly Co-Ordinated transport services through the optimum utilization of its available sources and suitable assistance /guidance from related level. Premium Rocket Bus between Cooch-behar and Kolkata is currently continues. NBSTC bus parked in Esplanade, Kolkata depot. Bus coaches.
