Evaluating Psychological Information: Sharpening Your Critical Thinkings Skills(4th Edition). It is through this method of critically evaluating psychology that I learned to think about psychology (and the world). This book is a wonderful guide to be used in the classroom or as an independent study manual. It is clear and concise and well written. It assumes no prior knowledge about psychology and most will find it approachable and helpful. Be warned: this book will change the way you look at the world! Mostly for the better but at times the critical thinking creeps in where you wish it wouldn't! Read more. Critical thinking is one of the most important skills you can have. So improving your critical thinking skills should be a priority. It means making logical and reasoned judgment based on analysis and facts, which in turn gives stronger results. Better bang for your buck. This book aims to bridge the gap between memorizing information and critically analyzing that information. In this way it aims to teach us how to think critically, by exploring the different components of conclusions, issues and conflicts, facts, reasons, and so on. This book is outstanding as an introduction to the subject of critical thinking because it takes us step by step through the entire process. Improving your critical thinking skills will help you save time, filter out irrelevant information efficiently, and prioritize your resources to get the best results. It will help you identify better problem-solving approaches rather than relying on standard methods that don't suit your case. Critical thinking will enhance your communication skills, reasoning, and logic. You will also become more compassionate and understanding for the perspectives of others. Detect common fallacies and rhetorical and psychological factors that can influence your thinking. The book presents the methods that good problem solvers use in understanding complex ideas. It provides practice in applying these methods to a variety of comprehension, analytical, and reasoning questions.
