UPDATE: Took this trade 2pm UTC 1st Februrary - turned out it was a great example of what I mean. If I hadn't used reduce-only, the stop limit order would still be in effect. So when the price went to that level (3. above), I'd open a buy order at that price, and I'd now be in an accidental long position. Polkadot Price Prediction 2021, DOT Price Forecast.
