

MCQs IN CLINICAL RADIOLOGY

GENITOURINARY, OBSTETRICS & GYNAECOLOGY AND BREAST RADIOLOGY

PRABHAKAR RAJIAH

Senior Registrar in Radiology, Manchester, UK

KEY SELLING POINTS

- ◆ Excellent revision aid, suited to R.C.R. exam format
- ◆ One of six radiology FRCR question banks
- ◆ Companion for self-assessment, useful for senior radiologists who wish to update their knowledge
- ◆ Ideal combination of information and revision resource.

BOOK INFORMATION

Price: £ 12.99
 ISBN: 1 904798 56X
 Pub Date: October 2005
 Format: Paperback
 Extent: 290 pages

Multiple Choice Questions are the most common method of assessing knowledge in radiology. This book has more than 1000 questions, covering all the essential topics in Gastrointestinal Radiology. The questions have been divided into separate topics, which will enable revising the subjects on a topic basis, with due emphasis on anatomy, techniques and pathology. The questions have been designed on the format used by the Royal College of Radiologists UK, Ireland, Hong Kong, Australia and New Zealand. There is a single question with five stems, which require a true or false response. The answers and detailed explanations are provided at the end of each chapter. This book will be a valuable resource for review and practice prior to the Fellowship exams. Bibliographies have been provided for further reading.

MCQs in Clinical Radiology. Gastrointestinal. . and Hepatobiliary. Along with the tremendous advances made in the various subspecialties of radiology, the level of knowledge not just in depth but also in breadth and the skill required to sit MCQ exams has increased as well. The format of the Fellowship Exams over the recent years has been changed to reflect these advances. There is no gain saying the fact that the best method of preparing for these exams is keeping abreast of recent advances reading the standard radiology textbooks and journals. However, there is a place for books such as these, which can be used to develop knowledge and hone skills necessary. This book offers a collection of specimen multiple choice questions (MCQs) for the first FRCR examination in clinical radiology that is for the physics module. It includes questions arranged in nine sets of 40 MCQs following the examination format. Additionally, chapters cover explanation to some of the answers for better understanding of the topics.
