Narrative Approaches to Working with Adult Male Survivors of Sexual Abuse: The Clients', The Counsellor's, and The Researcher's Stories

By Kim Etherington

Jessica Kingsley Publishers. Paperback. Book Condition: new. BRAND NEW, Narrative Approaches to Working with Adult Male Survivors of Sexual Abuse: The Clients', The Counsellor's, and The Researcher's Stories, Kim Etherington, 'This text offers insight into how being listened to, respected, responded to, and encouraged appropriately can enable even the most grotesque stories to take shape, be pulled apart and re-enacted into more healing ones. An engaging read. It demonstrates the deep value of reflexivity and reflection upon one's own practice and its relationship to personal life, the role of story and narrative both in understanding ourselves and our patients, and the effectiveness of paying attention to the full range of our own and our patients being - physical, social, spiritual, and emotional. This is a complex business and must be accepted as such.' - British Journal of General Practice 'The title of this work understates the content, since the book contains far more than the narrative approaches-though this aspect is at the centre of it. It is in fact four books: a case study of two brothers, both sexually abused in childhood; an account of one therapist's methodology; a characterisation of the impact of child sexual abuse; and a book...

Reviews

This type of book is almost everything and helped me hunting forward and more. I was able to comprehend almost everything using this published e.pdf. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Edwardo Ziemann**

This written publication is fantastic. I am quite late in start reading this one, but better then never. You will not feel monotony at at any time of your respective time (that's what catalogues are for concerning should you ask me).

-- **Tevin McClure**

Many survivors of sexual assault struggle with feelings of shame, guilt, embarrassment and defectiveness, and have a decreased level of trust in others who are outside their identified support systems. To facilitate an environment that feels supportive and safe, I use the client's own language, focus on appropriate and accurate reflections, and allow the client to emote without much intervention on my part. This approach is geared toward a focus on what they still have versus what they feel they have lost. Once an initial narrative is written, I have the client read it out loud two separate times within the same session, or sometimes over the course of two sessions depending on the client's responses to the narrative work. I've already had adult survivors of childhood sexual abuse make contact about wanting to come into therapy since they have watched the "Leaving Neverland" documentary. With this much-anticipated programme, intrusive thoughts, the re-playing of events and the prompting of long-buried memories are hard to ignore for adult survivors of childhood abuse, even though many of them have kept their experiences of abuse secret for many decades. The media can trigger survivors of abuse. It's completely understanding why survivors choose not to disclose the abuse they experienced for many decades if at all. Robson's mother asked him, "Why didn't you tell me?" and he answered, "It's a real complicated question." The full findings have been described in *Adult Male Survivors of Childhood Sexual Abuse* published by Pitman (1995). The book includes many of the men's first person accounts of their experiences of abuse. Discover the world's research. 20+ million members. Research shows that child sexual abuse (CSA) can have detrimental effects on adult functioning. While much research regarding the effects of CSA on parenting of mothers is available, there is a dearth of information on how CSA impacts fatherhood. Restorying fatherhood as a healing opportunity is essential when working with fathers who are male survivors and their families. [View](#). [Show abstract](#).
