As such, this fighting manual of the late medieval period is invaluable, particularly due to the accessibility of the techniques contained therein. While others may find this volume a bit advanced for the novice of medieval swordsmanship, I find the pictures and descriptions eminently understandable (and I'm certainly a novice). The text focuses on the REAL art of the fighting man, centering on applications of the long sword, dagger, falchion and unarmed combat, and it's neither "chivalrous" in the modern sense of the word, nor pretty. The techniques within are designed for the professional fighting man, and the full emphasis is on surviving a fight, and not looking pretty while you do it. The Codex Wallerstein is one of the best known of the late medieval fencing treatises still in existence. Though perhaps not as widely known as Talhoffer 1467 or Flos Duellatorum, it is just as important to students of the Western martial arts. Originally written in Middle High German during the late 14th and early 15th centuries, the Codex Wallerstein has long been available to scholars in microfilm format from Augustusburg University. The codex offers a series of fundamental counters to common attacks, using the longsword, falchion and dagger, as well as the complete system of wrestling techniques. In this work the reader will find a great deal of instruction on thrusting at or closing in against an opponent, expanding Master Johannes Liechtenauer's art of longsword combat. Codex Wallerstein (or Cod.
