(truth), even if the process of managing what happens or establishing what's real is painful. These three distinct ways of wanting to be effective go beyond just wanting pleasure, but there is even more to the story of how motivation works. These ways of wanting to be effective do not function in isolation. Rather, they work together. Indeed, the ways that value, truth, and control work together is the central story of motivation. From Wikipedia, the free encyclopedia. The Agrarian History of England and Wales is an academic work, published by Cambridge University Press, which in 8 volumes covers the period from the origins to 1939.[1] Vols. 1 and 5 are each in two parts. Historian Joan Thirsk was the editor for volumes 4 and 5, and in 1974 she was appointed general editor of the series.[2]. Volumes. Details for each volume. 1500-1640. 1967. ISBN 978-0521066174 (Hardcover) The purposes of this book are threefold. The first is to introduce the reader to the burgeoning literature on England's agricultural regions in the sixteenth and seventeenth centuries, and to explain how historians construct them and arrive at different maps with varying boundaries. The second aim is to offer a simplified schedule of farming regions that will help the reader to perceive the main characteristics of England's landscape before venturing to absorb, compare and judge the detail that has been offered by specialist scholars. A further analysis of farming regions, covering the period 1640-1750, appeared in 1985 in volume V of The Agrarian History of England and Wales [23].
