Occupational therapy (OT) is the use of assessment and intervention to develop, recover, or maintain the meaningful activities, or occupations, of individuals, groups, or communities. It is an allied health profession performed by occupational therapists and occupational therapy assistants (OTA). OTs often work with people with mental health problems, disabilities, injuries, or impairments.

Measuring occupational performance : supporting best practice in occupational therapy. Item Preview. > remove-circle. Provides easily accessible, up-to-date information for all occupational performance measures, including a systematic, detailed focus on measures important for evidence-based occupational therapy. Measurement issues and practices are discussed, and a decision-making framework is provided to guide the choice of assessment tools. Revised edition of: *Measuring occupational performance* / Mary Law, Carolyn Baum, Winnie Dunn. c2001. Includes bibliographical references and index. Access-restricted-item. See details and exclusions - *Measuring Occupational Performance: Supporting Best Practice in Occupational*. Qty. 1 2 3 4. An approach to assessing occupational performance. It provides a background of measurement concepts and explores the central theoretical concept of occupational therapy. The key actions that therapists must implement when conducting assessments are then outlined. Product Identifiers. *Occupational Performance Measures: A Review Based on the Guidelines for the Client-centred Practice of Occupational Therapy*. May 1990. *Canadian Journal of Occupational Therapy* 57(2):77-81. The first step in this process was to review critically those outcome measures which assess occupational performance and that are currently available in the literature. This paper will present the review process, describe in more detail eight assessments that fulfilled many of the review criteria, discuss the limitations of these measures using the "Guidelines for the Client-centred Practice of Occupational Therapy as the framework, and make recommendations for the development of a new outcome measure for use in occupational therapy. Occupational performance Client satisfaction Role competence Adaptation Health and wellness Prevention Quality of life. what type of outcome measure is the ability to carry out performance areas in occupation? occupational performance. what are the 2 ways that clients can carry out performance areas in occupation? improvement enhancement. What is the best researched model, with most evidence to support use - it involves occupational performance is a combination of volition (motivation for occupation), habituation (organization of performance into roles and routines), performance, and environment? MOHO. CMOP.
