Choices and Opportunity Cost A Lesson by Katy Reisch and Donna Boyle
Materials Needed: Play dough (enough for each student to produce a small sculpture), Small articles of capital.
Subject Area: Economics
Grade Level: Third to Fourth
Time Allowance: One hour time period
Objectives: To teach what opportunity cost means. To teach that there is an opportunity cost to every consumer choice. To teach students to identify the opportunity cost of a consumer choice.
Description: When individuals produce goods and services, they normally trade most of them to obtain other more desired goods

Pricing for a pre-ordered book is estimated and subject to change. All backorders will be released at the final established price. As a courtesy, if the price increases by more than \$3.00 we will notify you.
Science experiment in space. You are here. Home. Science experiment in space. What do you think will happen if you wring out a wet cloth in space?
Astronaut Chris Hadfield performed a simple science experiment designed by high school students to find out. Instructions. Do the preparation task first. Then watch the video and do the exercises. Remember you can read the transcript at any time. Preparation.
Meredith and Kendra suggested that I dip this in a bag, but bags don't hold water in space so instead I filled a water bag "this has drinking water in it" and I'm going to, uh, squirt a bunch of water into this washcloth. OK, so here's a soaking wet washcloth. Get the microphone so you can hear me while I'm talking.
