Description:

From *Starred Review* Nobel laureate Gore is dedicated to one of the most important missions on the planet: educating humankind about the causes and consequences of global warming and offering solutions to the looming crises implicit in the changes to the earth's climate and habitability that are already well under way. No one is more qualified than Gore to lead the collective movement beyond fossil fuels, given his command of the science and politics involved, his invaluable global connections and resources, and his sensitivity to our reluctance to face the "magnitude and gravity of the climate crisis." As he did in *An Inconvenient Truth* (2006), Gore matches clear and ringing explanations and commentary with superb supporting diagrams and illustrations and striking photographs from around the world, documenting the dramatic impacts of human industry and climate change. He begins by providing the straight facts about the sources of the pollutants causing global warming and the disastrous energy inefficiency of our buildings, vehicles, appliances, and industrialized agriculture. Here, too, is the searing truth about the campaign of climate change denial

via disinformation and ridicule orchestrated and paid for by oil and coal corporations. But after spending three years convening “solution summits” and assessing the fruits of those productive discussions, Gore turns away from blame and despair and toward answers and encouragement. The result is a veritable catalog for a better world and a practical guide to solar, wind, and geothermal power and smart “super grids,” endeavors China is already pursuing. Gore also eloquently explains how the harnessing of renewable energy sources will solve an entire matrix of global traumas. Our Choice is an inviting and momentous compendium of environmental discovery (with 100 percent of its earnings going to the Alliance for Climate Protection) that addresses one of the greatest threats our species has encountered with intelligence, knowledge, wisdom, and faith in human empowerment. This is a book that should be displayed and talked about everywhere. --Donna Seaman
