

# Shore Protection Manual, Volume 2, . Coastal Engineering Research Center (U.S.)

Shore protections with suitable slopes were constructed at the shallow seabed area and sheet pile walls were used for deep water and at locations where berthing feasibility was required for the future. For the Changi East Reclamation Project, 10 km of rock bund and about 4 km of sheet pile retaining wall were constructed. Volume of Sand Needed for the Construction of the Investigated Scenarios in the Mouth of the Estuary. Scenario. Scenario Name. Volume of Sandbanks (—106 m3). 5.2 from the Shore Protection Manual (1984), SPM. By way of illustration consider the following example a site is has a fetch 2 km long in the North-South direction and 1 km wide in the East-West direction. Consider a constant wind blowing from North to South at a speed of 20 m/s. Buy Shore Protection Manual, Volume 2: NHBS - US Army Coastal Engineering Research Center, Business Books Ltd.
